I really like this game as well because there is nothing stopping you playing like in many other games you may have the energy to keep you from playing, but in this game you can keep going as long as you like. The only thing I want is some updates to new upgrades and weapons. Movement and shoot stop yourself randomly. Lots of useless weapons or high sky prices with no utilities to match. Laser Gun is very highly appreciated and completely useless compared to Chainsaw. Flamethrower is useless. The Ak47's unlimited ammunition is useless given the cost. Mechs now die faster than you die with cheaper shields and better weapons. Bring back the invincible mech. A lot of gold and gems were wasted then I was pretty disappointed. Love playing this game but now my iPhone is updated to iOS 11 it doesn't allow me to play cuz the app isn't updated so please update and anything else you have to update your intelligence frequently like mech new weapons and characters and lower prices on lots of weapons and stuff so please update so I can start playing again. . and once you get it to work will rate it 5. .
